Phenotypes, etc.

Improve genome quality

New information is available instantly on FungiDB.org *

Pick up a free FungiDB mug or a T-shirt!

* while supplies last

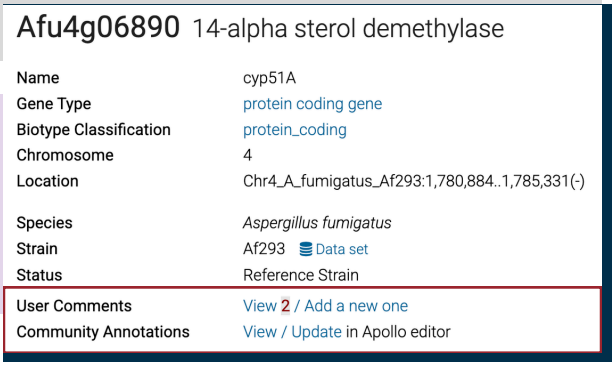
The top 10 submitters will also get a FungiDB T-shirt!

Pick up at the FungiDB help desk during poster sessions

What is a user comment, and why is it important?
User comments harness the knowledge of an expert community to provide valuable insights into gene function. They may include the latest research findings, relevant PubMed IDs, images, or even negative results — ensuring that the most current and comprehensive information is captured.

How to create a user comment:

1. Log in or create a new account.
2. Navigate to a gene record page.
3. Click to **add a new user comment**



Afu4g06890 14-alpha sterol demethylase

Name	cyp51A
Gene Type	protein coding gene
Biotype Classification	protein_coding
Chromosome	4
Location	Chr4_A_fumigatus_Af293:1,780,884..1,785,331(-)
Species	*Aspergillus fumigatus*
Strain	Af293 Data set
Status	Reference Strain
User Comments	View 2 / Add a new one
Community Annotations	View / Update in Apollo editor

NEW

AI-powered Summary and Gene Product Description
automatically generated from the specified publication or PDF

Try creating user comments using AI-powered tools, accessible directly from the user comment form!

Did you know you can also use **Apollo, a web-based genome editor,** to update gene models? You can create or delete genes and insert introns, exons, and more.

VEuPathDB is funded by

- A discretionary Award from the Wellcome Trust, ***"Pioneering a User-Supported Financial Sustainability Model for Essential Database Resources"***
- Coefficient Giving
- The Universities of Pennsylvania and Georgia
- Wellcome Trust Resource Grants
- UK Research & Innovation for plant pathogens
- **Voluntary user subscriptions - please do your part and subscribe to keep essential informatics resources open for all!**
