

The Download tab on the ClinEpiDB platform

The **Download** tab on the ClinEpiDB analysis page allows you to download data and work with it on your own.

Data downloads are subject to data access requirements that are put in place by study teams. **Public** datasets have no restrictions on downloads. For **Controlled** and **Protected** datasets, you will have to log in and submit a data access request before you are allowed to download data.

We offer two options for downloads: **My Subset** and **Full Dataset**. Let's look at each of these.

My Subset allows you to customize the data you download.

My Subset

Configure and download one or more tabular files of the filtered dataset

- 155 of 252 Households
- 194 of 335 Household Repeated Measures
- 498 of 640 Participants
- 1,734 of 3,186 Participant Repeated Measures
- 1,734 of 3,186 Samples

Filtering the data in the **Browse and Subset** tab will customize the observations/rows included in **My Subset** downloads.

Amazonia ICEMR Brazil Cohort

Participants: 498 of 640 records selected

Participant	Household
1	h_54
10	h_7
100	h_47
1000	h_511
1001	h_417
1003	h_417
1004	h_129a
1005	h_129a
1006	h_129a

select all | clear all | expand all | collapse all

Find a variable

- ☐ Participant
 - ☐ Administrative information
 - ☐ uld Age at enrollment
 - ☐ uld Enrollment date
 - ☐ uld Enrollment study period
 - ☐ uld Time living in survey area
 - ☐ Demographics
 - ☐ uld Participant wealth index
 - ☐ uld Sex
 - ☐ uld Birth date
 - ☐ uld Birth place
 - ☐ uld Participant wealth index categorization
 - ☐ uld Education level
 - ☐ uld School year

Customize the columns/variables included in **My Subset** downloads by clicking open any of the data tables and adding columns of your choice. Then, download your subset.

Full Dataset allows you to download the entire dataset.

Full Dataset (Release 21)

Date: 2022-MAR-03

Change Log: Data were reformatted for the new version of ClinEpiDB. Some variables may have updated labels or changed files.

File Description	Type	Size
↓ rls0021_Amazonia_Brazil_cohort_Download_Files_README	txt	0.01 MB
↓ rls0021_Amazonia_Brazil_cohort_Household_repeated_measures	txt.zip	0.01 MB
↓ rls0021_Amazonia_Brazil_cohort_Households	txt.zip	0.00 MB
↓ rls0021_Amazonia_Brazil_cohort_OntologyMetadata	txt.zip	0.02 MB
↓ rls0021_Amazonia_Brazil_cohort_Participant_repeated_measures	txt.zip	0.07 MB
↓ rls0021_Amazonia_Brazil_cohort_Participants	txt.zip	0.06 MB
↓ rls0021_Amazonia_Brazil_cohort_Samples	txt.zip	0.03 MB

Note that each study has a README file which includes

- General information and recommendations for opening the files
- A description of the ontology metadata file
- Descriptions of each data file, including what identifiers can be used to link between files

To look at associations between variables in different categories such as Households, Participants and Samples, identifiers such as Participant ID, Household ID and Sample ID are included in these download files, allowing you to link data between various download files.
