

Navigating the ClinEpiDB Beta Platform

A structured exercise

Start at the home page: beta.clinepidb.org

- In the “**Find Studies**” box, search for **PRISM2 ICEMR Cohort**
- Locate the **study card** and click on the title of the study

1. Look at the **diagram** at the top of the page and examine the shape of the data

- a. There are participants in this study.
- b. There are participant repeated measures in this study.
- c. What does it mean to have >1 repeated measure per participant?

2. Click the “**View study details**” tab and answer the following:

- a. What is the study design?
- b. What was an objective of this study?
- c. Where was this study conducted?

3. Click the “**Browse and subset**” tab

- a. Name one of the featured variables:
- b. What proportion of participants were in the <5 years age group?
Hint: You can search for variables in the "find a variable" box in the left sidebar
- c. What was the mean age of the participants?

4. Click the “**Visualize**” tab and choose the **bar plot** tool

For the main axis variable, choose “**age group**”. For overlay, choose “**sex**”

Under the plot, choose “**proportion**” instead of count

- a. What proportion of males were in the 5-15 age group?

NOTES

Thank you for completing this exercise on navigating beta.clinepidb.org!
