

VEuPathDB.org

Eukaryotic Pathogen, Vector & Host
Informatics Resources

An Open-Access, Online Data Resource ...

... Making Infectious Disease Research Easier and More Powerful

25 years and
counting!

VEuPathDB brings **computing tools** to **scientists of all backgrounds**, not just computer experts. This platform lets users **explore complex biological data** with simple, click-based tools.

46,000 monthly
users

VEuPathDB is widely used in **laboratories & classrooms**. Tutorials, videos, webinars & workshops provide a **learning hub** for training the next generation of researchers in **real-world bioinformatics**.

150 countries

VEuPathDB helps researchers **unlock the power of data**, making it easier to **share, find & reuse** data, supporting open science, innovation & **real-world health solutions**.

VEuPathDB is a **one-stop shop** for scientific discovery. Everything is in one place: **data, tools & analysis features**, making it **easier & faster** to discover patterns & test ideas.

VEuPathDB is a **global hub for scientists** working on **critical diseases**. By spurring data sharing and collaboration, it helps researchers everywhere **do more, together**.

Human & Veterinary Diseases

- Malaria
- Sleeping sickness
- Chagas disease
- Cryptosporidiosis
- Giardiasis
- Toxoplasmosis
- Babesiosis
- Candidiasis
- Aspergillosis
- Valley Fever

Other Arthropod-Borne Diseases

- Dengue fever
- Lyme disease
- Zika virus disease
- Chikungunya
- Yellow fever

Fungal Crop Diseases

- Wheat & rice blast
- Potato blight
- Leaf spot & root rot
- Powdery mildew
- Food spoilage
